

Barcode Scanning Sample

OUTPERFORM THE FUTURE™

This sample provides barcode scanning capabilities for Magic xpa Android client using **Pic2Shop** application (<http://www.pic2shop.com/developers.html>).

A new activity added in this sample will call the **Pic2Shop** activity and on receiving response, it will raise Magic Xpa User Event.

The sample can be used by following the below steps:

1. Install **Pic2Shop** application on the device from Google Play Store.
2. Copy the files from the folder
SampleProjects\Rich Internet Samples\Android\BarcodePic2Shop-src to the folder
RIAModules\Android\Source\app\src\main\java\com\magicsoftware\magicdev.
3. In the **AndroidManifest.xml** file, add the following lines inside the application level (for example, before the `</application>` line):

```
<activity android:name="Pic2ShopActivity"  
    android:configChanges="keyboardHidden|orientation" />
```

That's it. You can now build the customized Android client by running the **build.cmd** file (under **RIAModules\Android\Source**), install it on your device and run the sample.

About Magic Software Enterprises

Magic Software Enterprises (NASDAQ: MGIC) empowers customers and partners around the globe with smarter technology that provides a multi-channel user experience of enterprise logic and data.

We draw on 30 years of experience, millions of installations worldwide, and strategic alliances with global IT leaders, including IBM, Microsoft, Oracle, Salesforce.com, and SAP, to enable our customers to seamlessly adopt new technologies and maximize business opportunities.
